All of What We Can Do

ichigo ichie®

Introduction of 「ichigo ichie®」

A comfortable life full of smiles; Everyone wants to live that way.

With our products, we would like to support your life filled
with smiles and wonderful encounters.

This is how we call our concept " ichigo ichie ".

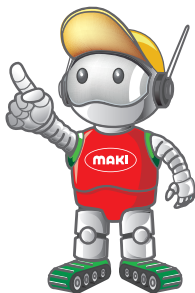

ichigo ichie® concept

"Ichigo ichie" is based on the idea of Japanese traditional tea ceremony;

"You have this opportunity just once in a lifetime,
so do your best to entertain your guests."

We respect every opportunity with customers,
so we do our best to meet their needs with
the spirit of " ichigo ichie "
by improving our products for the better.
Thus, we would like to position our " ichigo ichie "
as a unique brand loved by people in the world.

Association

SG Mark Certified Factory

Our factory has passed the examination of SG Standards,
and is registered as an SG Mark certified factory
by the Product Safety Association in August 2009.

Manual wheelchair

Walking trolleys

Stick

SG mark certified product by Product Safety Association (Japan)

Products with the SG Mark are highly safe products that meet appropriate certification standards. If the product with the SG Mark should have a defect and a personal injury occurs due to the defect, we will compensate for the damage according to the cause of the accident and the degree of damage. This is a feature of the SG Mark system, and it is a symbol for everyone to use it with peace of mind, from ensuring product safety to compensation for accidents resulting in accident.

Features of back and knee joint interlocking 1 motor bed / Mckinley Care Bed

OPTIONAL Features

1 Reclining function

It is possible to get up to maximum inclination of 75°. Since it is a stepless reclining, you can adjust it to your favorite angle.

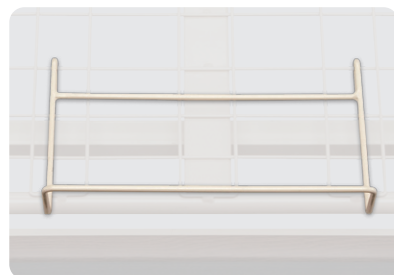

2 Remote control

The remote control is simple and easy-to-press. It is a simple and user-friendly design to understand and operate.

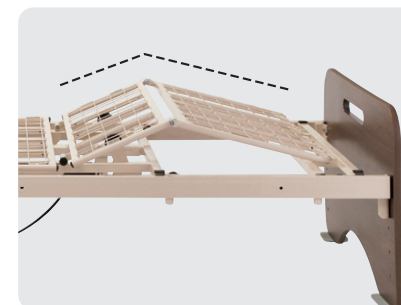

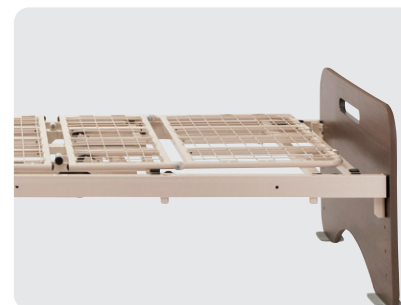

3 Mattress hook

It reduces the discomfort of the user by preventing the mattress from slipping. The mattress stopper is attached to OPTIONAL and McKinley Care Bed.

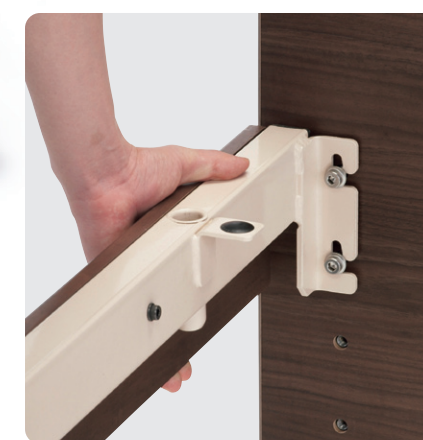

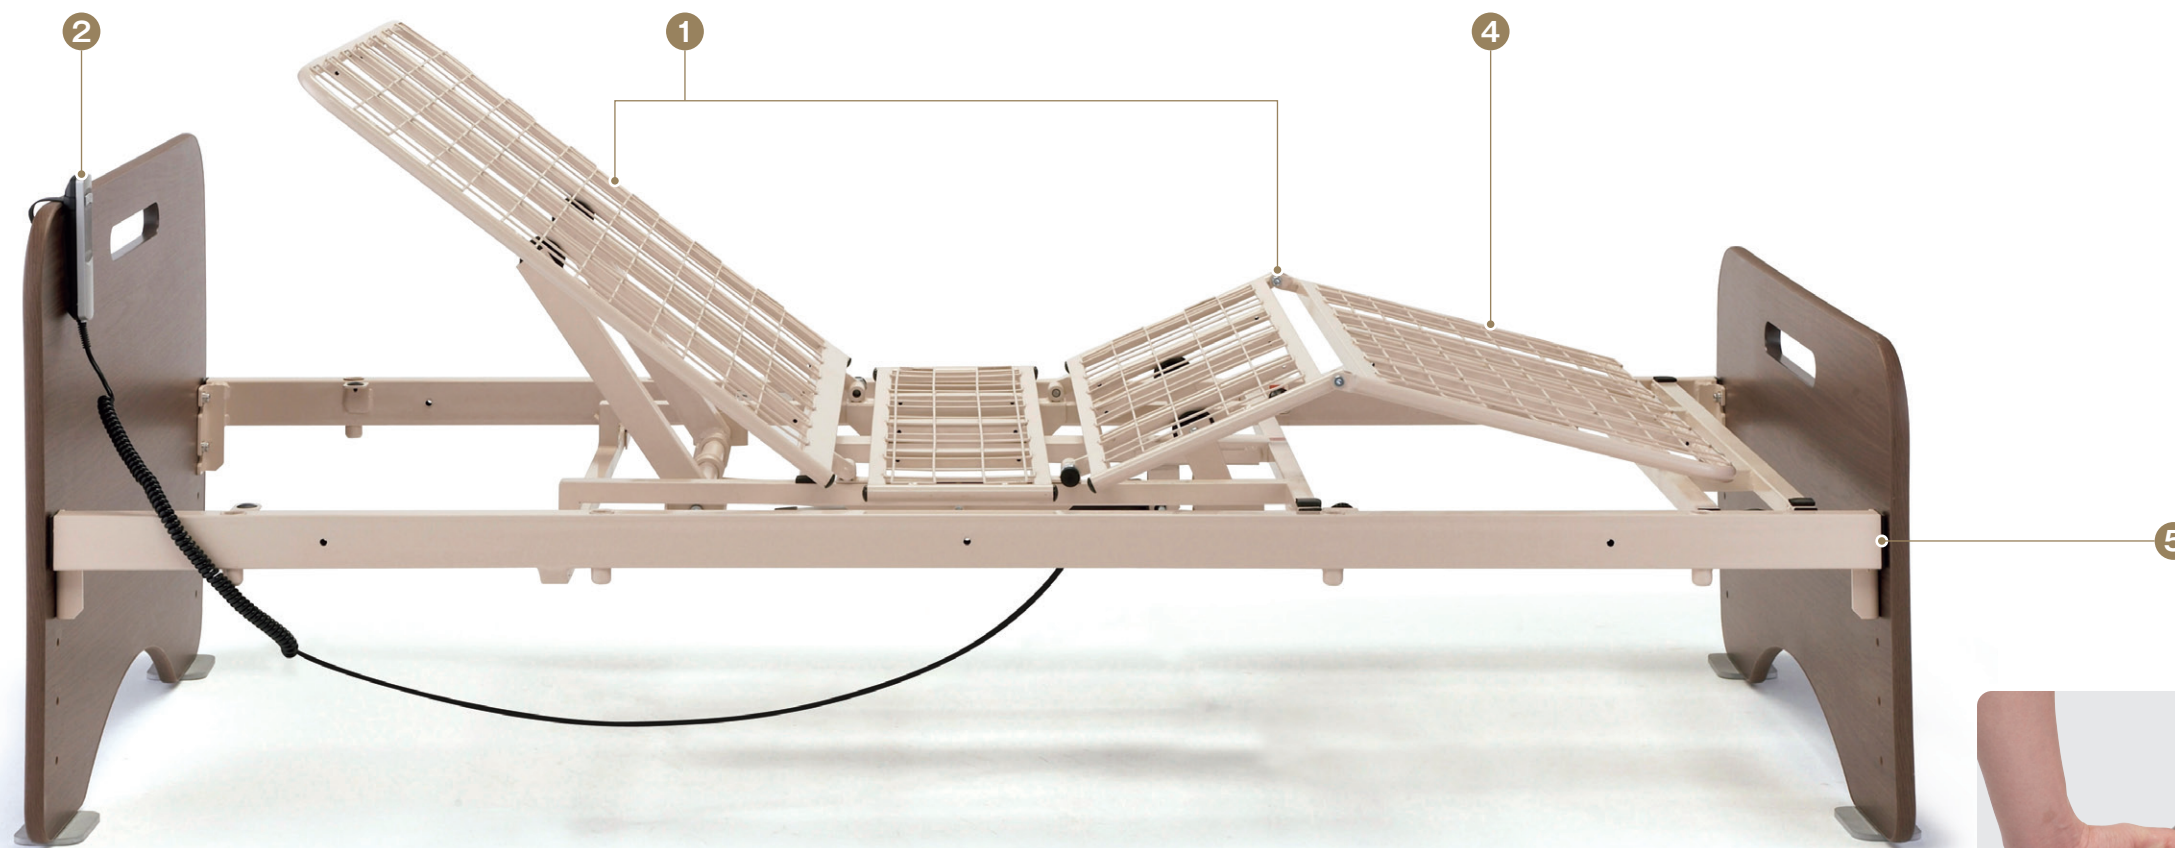

Mounting example

4 Knee-raising function

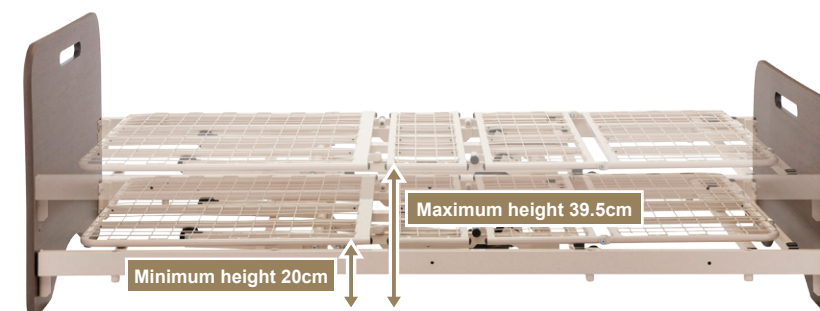

It goes up to 20° in conjunction with the backrest. If you do not need the knee-raising function, you can switch it off by removing the joint interlocking bar.

Height adjustment example

5 Height adjustment function

The height can be adjusted in 4 steps. Mounting holes are installed at a pitch of 6.5 cm, and the floor-to-bottom height can be adjusted between 20 cm and 39.5 cm.

Independence support 3 motor bed / Independence support 2 motor bed

McKinley Care Bed 3 / 2 Motor

Type S / Type F

Specification

Type : Type S, Type F
Weight : [Type S/3 motor] 85.5kg
[Type S/2 motor] 84.5kg
[Type F/3 motor] 87kg
[Type F/2 motor] 86kg
Material : Base frame part : steel /
Head / footboard:Printed veneer board
Floor height : 27.5~60cm
Voltage : AC100V , 50/60Hz
Electric power : 80W
Maximum user weight : 120kg / Maximum working load 1,700N
Packing : 6 packing

* Back raising 75 ° is possible by adopting
the back knee joint interlocking bar.

Size

Simple

Easy to use

It is easy use the 3 movements of raising/lowering,
raising the back, and raising the knee with a remote control.

Easy maintenance

This bed mainly consists of 6 parts, and can be assembled and detached
without tools.
Because the frame structure is simple, it is easy to clean the main body
and replace parts. * The motor and control can be wiped off, but they are not completely waterproof.

Safety

Size and functional design for accident prevention

By reducing protrusions, corners and possible dangerous gaps,
it is designed to be used more safely and comfortably by users and
caregivers.

*This is an example.
* Mattress is not included.

7 features of independence support motor bed

McKinley Care Bed Features

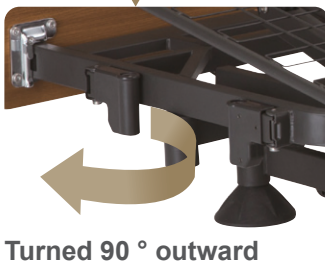

1 Reclining function

Back-raising to 75 °: This helps you to get up easily.
Knee-raising to 20 °: This prevents the body from slipping when getting up.
* For 3 motor bed, the back and knee can be operated independently.
* For 1 and 2 motor bed, back and knee can be worked together.
(However, it is possible to operate the back alone by switching the back and knee joint interlocking bar in ⑤.)

2 Remote control

Because the control is flat, it is easy to push buttons, and easy to wipe dust off. The control is arc shaped, so you can grip it easily and prevent erroneous operations when it is placed face down.

3 Side-rail mounting bracket

A total of 4 side rail mounting brackets are provided on the head and leg sides. The brackets can be folded manually, allowing you to approach closer with a wheelchair. Also, you can secure clearance when transferring.

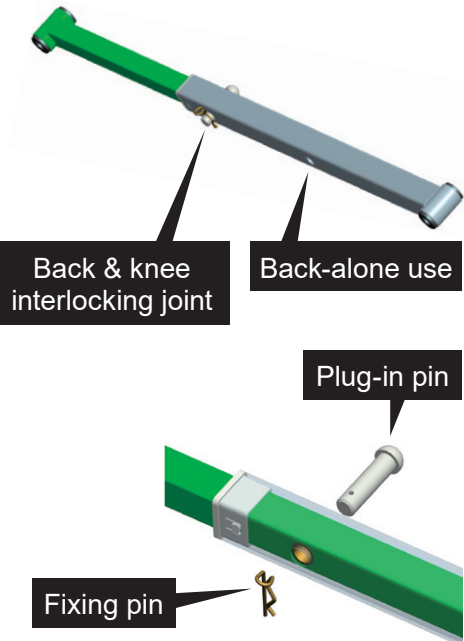

4 Subframe length adjustment

It is possible to extend the mounting of the subframe by 5 cm on each head side and foot side. As a result, the total length can be extended to 212 cm from 202 cm. However, the position of the back net and foot net do not change.
* The length is adjustable by inserting hooks in different positions.

5 Switching function of toes up and down

You can lower switching brackets behind the foot net towards base frame side, keeping toes up. It is possible to reduce swelling of your toes by setting toes-up positions. Please make sure toes are placed lower than the heart for people with cardiac insufficiency.

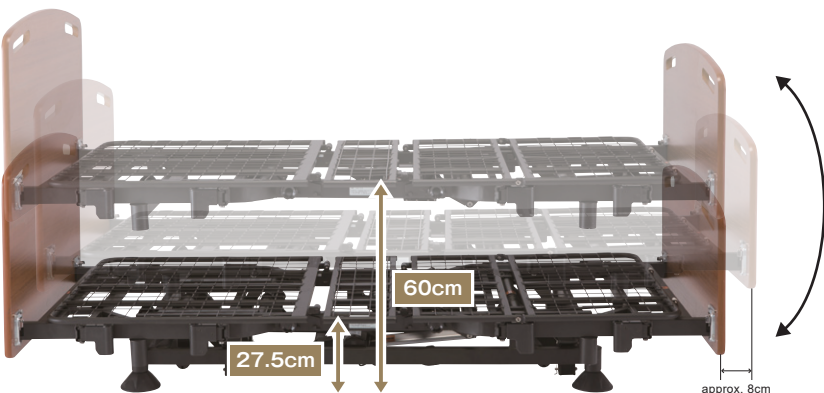

6 Back and knee interlocking bar (1 motor / 2 motor only)

Inserting the pin on different positions, you can switch from back and knee joint interlocking to back alone.

7 Elevating function (27.5 cm to 60 cm) (2 motors and 3 motors only)

Adjusting the height helps you to stand up or transfer to a wheelchair.
* During operation, the bed moves to the foot side. When installing the bed, secure at least 9 cm of space on the foot side and a little room on the head side, too.

Independence support 1 motor bed

McKinley Care Bed 1 Motor

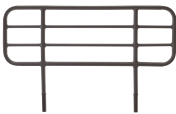

Type S ~Standard~

1 motor / LMB-100

JAN code 4968501-933509
TAIS code 00690-000064

* Extension legs of 14 cm are attached.
* The image shows a floor height of 35 cm when the extension legs are installed.

Size

Options

Mattress

Profile urethane mattress

Product number MPU-1950 JAN code 4968501-936203

Mattress hardness Rather soft

Specification

Material : Side: Polyester Cushion material: Urethane foam
Size : D191×W91×H8cm
Weight : Approx. 4.8kg

Concavo-convex profile processing is applied to the urethane surface, making the contact area smaller and the feeling of oppression is lightened. Moderate hardness of cushion is excellent.

Wave stretch mattress

Product number WM-WS1 JAN code 4531620-126093

TAIS code 00076-000063

Mattress hardness Hard

Specification

Material : Side: Polyester Cushion material: Polyester fiber
Size : D190×W91×H8cm
Weight : Approx. 7kg

As it is a dense polyester, it does not easily become exhausted, and has moderate cushioning. The two-layer structure reduces misalignment on the body when raising the back. Because it is corrugate, it fits your body according to your posture.

Lacra Positioning Mattress (Ventilation Type)

Product number RK-PM-BR-910R JAN code 4582328-920674

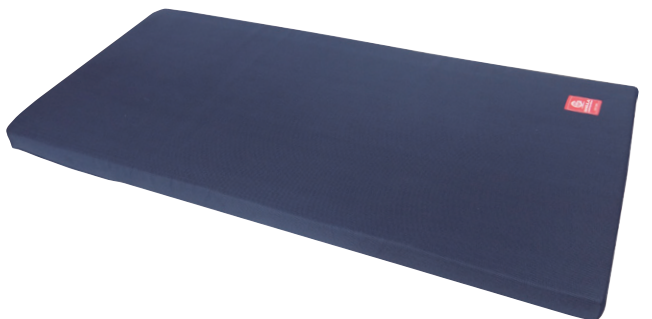

TAIS code 01149-000020

Mattress hardness Normal

Specification

Material : Side: Polyester Cushion material: Natural pure latex
Size : D195×W91×H7.5cm
Weight : Approx. 13.5kg

The softness and high resilience support the body in a well-balanced manner, helping to turn over and get up. The antibacterial properties of natural latex keep it clean, breathable and resistant to stuffiness. In particular, body pressure dispersibility is effective in preventing bedsores and supports up to stage 2.

Options

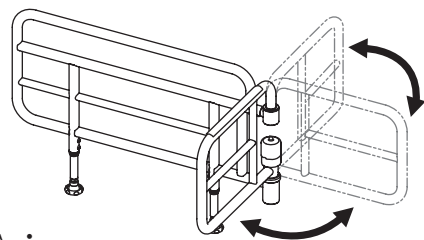

Bed rail

Product number	LMB-KB
JAN code	4968501-946509
TAIS code	00690-000082

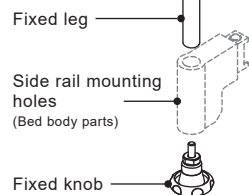

■ specification	
Size	: W118.5×D5.5×H46.5cm
Weight	: approx. 7.5kg
Material	: steel
Pipe thickness	: φ25

1 Grip

The grip can be fixed in 15 degree increments, enabling to rotate the grip to the angle that suits your purpose.

2

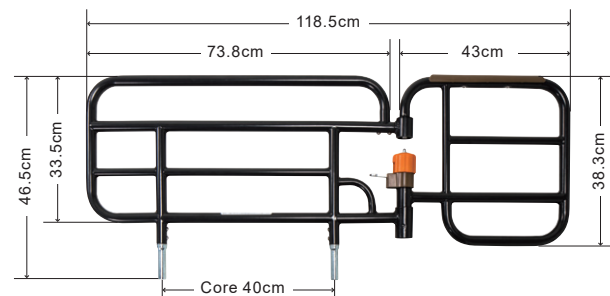

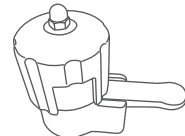

2 Fixed knob

The knob fixes the legs of side rail from below. You do not have to worry about them coming off.

3 Lock knob

[Release of grip (free)]
Turn the safety lock counterclockwise completely until the lock display disappears. The grip is released by raising the lock knob in the released state.
[Grip fixing (lock)]
Adjust the grip to the angle that suits your purpose and then lower the lock knob for safety. Turn the lock clockwise until you can see the lock display completely.

Upgrade option It is possible to upgrade from 1 motor bed to 2 motor and 3 motor beds.

Usage example

Rollators

Rollators Wide

Internal dimensions of the handle approx.39.5cm

Compared to the conventional model, the width of handlebars are wider, making it easier for people with large physiques to handle.

HXS-395YL
(Yellow)

Thick back cushion

A thick urethane cushion is used to reduce the burden on the back.

Grips and brakes

The handle height can be adjusted in 6 steps and can be raised up to 83 cm. When you grasp the brake lever, the brake is applied, and when you lower it, the parking stopper is applied.

Brake / parking stopper

Since the area of the part that attaches the tire is large, it is hard to leave marks and hard to put a burden on the tire.

Under-seat basket

Since the mesh is finely tuned, even small luggage will not fall.

Product number	HKM-100	JAN code	4968501-911804	TAIS code	00690-000046
■ Specification Size : W48.5(48.5)×D44(12)×H65~75(66)cm Rear49 ()when folded Height can be adjusted in 5 steps (2.5 cm intervals) Rubber tip size : 22φ Weight : 2.1kg Main material : Body (Aluminum), Grip (PVC), Rubber tip (Synthetic rubber), Other resin part (PE) Packing size / Weight : W50×D11×H70cm·3kg					

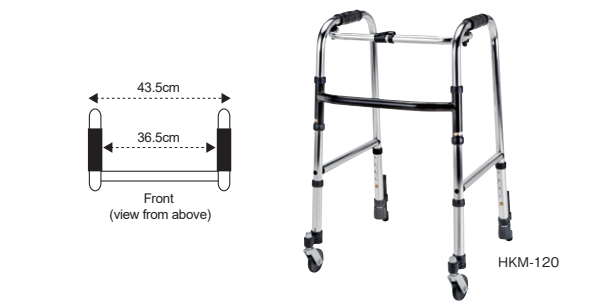

HKM-110 (Fixed type / mini type, with fixed front wheels)

Product number	HKM-110	JAN code	4968501-949104	TAIS code	00690-000076
■ Specification Size : W48.5(51)×D47.5(12)×H73.5~83.5(75)cm Rear49 ()when folded Height can be adjusted in 5 steps (2.5 cm intervals) Rubber tip size : 22φ Weight : 2.3kg Main material : Body (aluminum), grip (PVC), rubber tip / caster (synthetic rubber), Hind leg stopper (nylon), other resin (PE) Packing size / Weight : W50×D11×H70cm·3kg					

HKM-200 (Alternative type / mini type)

Product number	HKM-200	JAN code	4968501-912207	TAIS code	00690-000047
■ Specification Size : W47(47)×D43.5(12)×H65~75(67)cm Rear48 ()when folded Height can be adjusted in 5 steps (2.5 cm intervals) Rubber tip size : 22φ Weight : 2.5kg Main material : Body (Aluminum), Grip (PVC), Rubber tip (Synthetic rubber), Other resin part (PE) Packing size / Weight : W50×D11×H70cm·3.4kg					

HKM-120 (Fixed type / mini type, with flexible front wheels)

Product number	HKM-120	JAN code	4968501-949203	TAIS code	00690-000077
■ Specification Size : W49(55)×D49(12)×H73~83(74.5)cm Rear49 ()when folded Height can be adjusted in 5 steps (2.5 cm intervals) Rubber tip size : 22φ Weight : 2.7kg Main material : Body (aluminum), grip (PVC), rubber tip / caster (synthetic rubber), Hind leg stopper (nylon), other resin (PE) Packing size / Weight : W50×D11×H70cm·3kg					

How to use walker

Walking image (Fixed type)
After you lift the walker and put it forward, you step forward with each leg.

Walking image (Alternate type)
Alternately move it forward according to your step.

Adjustment and usage

Hold button to release
Please open the left and right grips until the push button clicks.

How to open

How to close
Hold down the push button of the release device to close it.

How to install optional parts

When installing the optional parts, insert them until it clicks, and adjust so that all four legs are set on the same height.
As it is a push button type, it is easy to install.

Option

* Option parts can be used only with fixed type walkers.

Electric wheelchair
e-Economy

Scan here for e-Economy introduction videos

Seat width
43cm

KEY-01
(Orange)

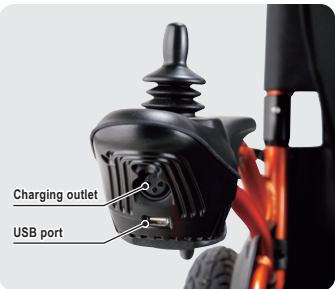

When folded

■ Main equipment

Control
* right side/left side(cannot be switched)
Power ON / OFF and speed adjustment can be easily operated with the buttons at hand.

Charging port and USB port equipped
A USB port is useful in case of emergency. (Electric wheelchairs cannot be charged from the USB port)

Fall prevention bar
The bar can be removed with a button when folding the wheelchair so it becomes compact when folded.

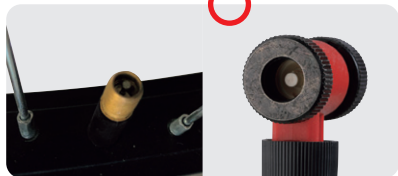

Clutch switching electric/manual
It can be easily attached and detached by operating a switching clutch placed inside of both rear wheels.

■ Specification

Color : Orange
Size : W63(35)×D104(104)×H91(76.5)cm
() is when folded
Front seat height : 48cm
Rear seat height : 46cm
Seat width : 43cm
Seat depth : 44cm
Arm support height : 22cm
Front wheel : 8inch
Rear wheel : 22inch
Weight : 29kg
Load capacity : 100kg
Main material : Frame (Aluminum), Casters (PU), Seat (Polyester)
Packing size / Weight : W109×D47×H77.5cm-35kg

■ Electric unit specifications

Product type : Simple type for self-operation
Maximum speed : 5.9km/h
Battery : Lithium ion 24V×14.5AH
Rated voltage : DC24V
Waterproof : IPX4
Charger : AC100V~240V 50/60Hz
Charging time : Approx. 7 hours
Continuous mileage : 15km / 1 charge
Practical uphill / downhill angle : 6 degrees

Suitable for American (Schrader) valve

English inflators cannot be used.

■ Seat color

Navy (Vinyl leather) Green plaid (Polyester)

■ Feature

Non-inflatable rear wheels are adopted as standard.
No need to worry about flat tires and maintenance is easy.

Since it has band brakes for caregivers, the burden on the tires is small and it stops firmly.

A GN model has screws covered on the seat surface, so it looks good and does no harm to users.

Installed example

Girdle stand

Product number	GD-32	JAN code	4968501-966309
■ Specification			
Full length	: Approx. 141-180 cm (stepless adjustment)		
Weight	: Approx. 1.1kg		
Main material	: steel		
Packing size / Weight	: W15×D5.5×H96cm・1.5kg *1 unit		
Girdle stand cannot be installed to wheelchairs of KC series, KS70, and KS80.			

Memory foam cushion with anti-slip on the back

Usage example

Memory foam cushion for wheelchairs

Product number	RRM-40RE	Red	JAN code	RRM-40RE	4968501-911743
	RRM-40BL	Blue		RRM-40BL	4968501-949302
■ specification					
Size	: W40×D40×H5cm				
Weight	: 600g				
Main material	: Cover: 65% polyester, 35% cotton Content: Urethane foam (antibacterial and deodorant finishing) * Washable cover type (dryer-safe) * With anti-slip back				
* In the photo, this cushion is used for a wheelchair with a seating height of 40 cm, but it can also be used for a wheelchair of 38 cm and 42 cm.					

Cylinder rack can be installed behind a self-propelled / assisted wheelchairs.

Installing is possible when the diameter of tipping lever ranges from φ19mm to φ22mm.
(However, installing may not be possible when accessories are attached.)
Installing is possible when the angle between the tipping lever and the back pipe is 90 degrees.
Oxygen cylinders with a diameter of 110 mm and 500 cc are compatible.

Cylinder rack

Product number	KO-B	JAN code	4968501-906800
■ Specification			
Weight : 1.0kg			
Cylinder rack cannot be installed to wheelchairs of KC series, KS70, and KS80.			

Aluminum name plate

Price depends on the number of plates.
Please contact us for quotation.

■ specification

Size : H4.5×W10~15cm
Main material : Aluminum name plate 0.3t
* The back side has adhesive stickers.

Suspension function

Built-in spring absorbs shocks, supporting your steps.

Flexible

Tilt up to 65° and rotation of 360° allow firm grip of the ground even on slopes!

Stick

Fashionable two tone designs with camouflage patterns are used. Slim neck designs allow the first and second fingers to be positioned closer, which make your hand restful and relaxing.

Features

Velcro tapes are attached to the strap.

How to use the strap

You can use the strap to attach the stick to something like a chair.

* Make sure to fix it with a velcro tape so that it will not fall over.

Stick in bundle

You can use the strap to bundle the stick when it is folded.

High-quality satin surface finishing

The satin finish of the pipe is comfortable to touch.

Compact type Walking Trolleys

CARRY THROUGH

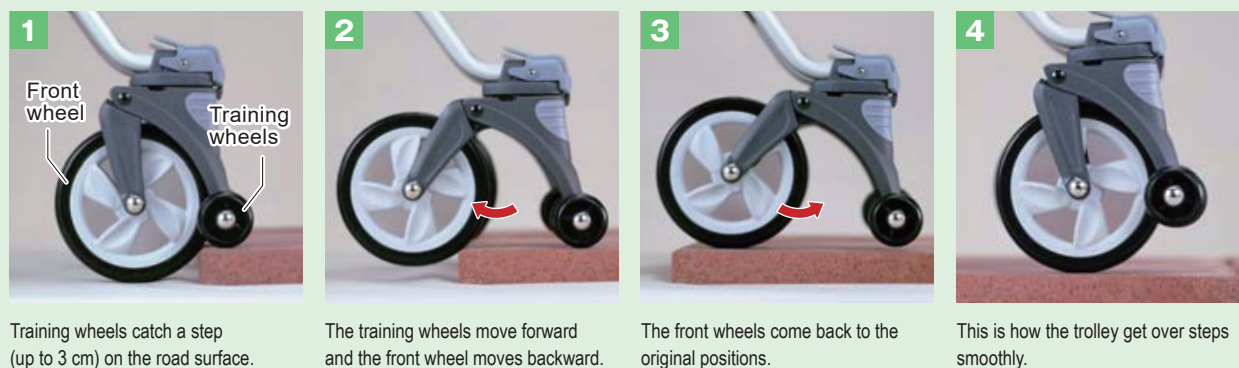

Our original design with a "step-through" function. This product enables you to get over steps with ease.

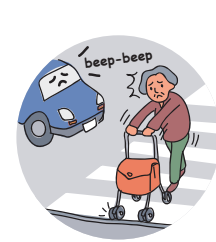

Japan Patent No.4344655

CARRY THROUGH is our original products with unique functions.

CARRY THROUGH equipped with the originally developed "step-through" function has excellent running stability and weight reduction of the vehicle body at the same time. This can be a new partner while shopping, taking a walk, or going anywhere.

Even now that barrier-free is advanced, there are many small steps on the road. For example, in Japan, standard steps between crosswalks and sidewalks are 2 cm. The reality is that users tend to stumble even on 1cm-high steps with common walking trolleys. CARRY THROUGH with a "step-through" function can provide to pass through of a step (up to 3cm) with ease by simply pushing the trolley.

Easy to use

Easy to fold. No need to take out things in the bag.

Users can easily fold this product back and forth with a simple operation. Because it is not necessary to take out things in the storage bag, it is easy to carry on the stairs or escalator.

Also safe for taller users. 1 meter of handle height is achieved.

The height of the handle can be adjusted between 80cm to 100cm. With 5 step adjustment at 5cm interval, users can choose preferable height.

Light, safe and easy to use

Originally developed handle

The ergonomic handle fits hands, preventing from slips and reducing hand fatigue.

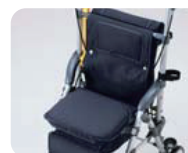

Easy handbrake

A handbrake which can be reached by extending your fingers while holding the handle. You can adjust the speed with a light force, which works even on steep slopes. Also, you can use it as a parking brake if you hold the handbrake down.

Light body

Just tilt the seat forward and it will turn into a chair anywhere. Even with a seat, this product weighs only 3 kg.

For safety while using

4 reflectors

This product has 4 reflectors in total, 2 at handle and 2 in the front, which are easy to recognize even when it's dark. Even on the rainy or dark weather, the reflectors glow when light reaches them.

* The product of the photo is CARRY THROUGH N.

Additional small-but-useful function

Umbrella stand & cane stand

【Front wheels】Smooth and easy direction change

Front wheels can be flexible & locked

It is easy to lock/unlock front wheels. When unlocked, the front wheels are flexible. When locked, straight stability improves and you can walk with stability even on slopes.

Easy to carry even in narrow places.

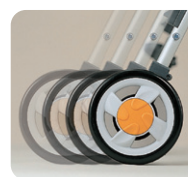

If you lock the front wheels, stability improves.

【Rear wheels】Braking oil damper is equipped

Safe wheels which rotate slowly even on slopes

The rear wheels are equipped with braking oil dampers. The speed can be controlled with oil force. The body is light, but you can walk smoothly and stably based on your walking speed. (This function is for XL type only)

COMMODE CHAIR

(Flip-up type)
With parking brakes

- Assembly type ■ Parking brakes ■ Soft seat
- Casters with front braking ■ Aluminum frame ■ Load capacity 100 kg

Product number	YC-70GR	TAIS code	00690-000091
JAN code	4968501-955907		

■ Specification	
Color	: Light green
Size	: W65×D76×H93 cm
Front seat height	: 53.5/56.5 cm (2-step adjustment)
Rear seat height	: 53/56 cm (2-step adjustment)
Seat width	: 40×40 cm
Back size	: W36×H26 cm
Arm support height	: 25.5/30 cm (2-step adjustment)
Foot support height	: 19 cm
Front wheel	: 3.9 inches with parking brakes (left & right)
Rear wheel	: 13.7 inches (solid)
Weight	: Approx. 13.7 kg
Load capacity	: 100 kg
Main material	: Frame (Aluminum), Handle grip (EVA), Backrest & seat cushion (Foamed PU), Parking (Stainless steel)
Packing size / Weight	: W95×D24×H53.5 cm·14.8 kg

Soft seat

When the footrest is flipped up

Casters with front brakes

Lower the lever of a front wheel to apply parking brakes, and raise it up to release the brakes.

When flipping up

Height adjustment of armrests
allows easier transferring.

BATH GOODS

BATH TRANSFER CHAIR

Usage example

RSB-685GR
(Light green)

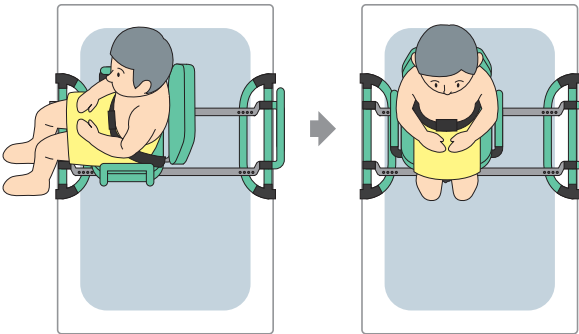

360°rotation
If you rotate the seat while pushing down the red lever under the seat, the seat will rotate 360°at 90°interval.

Rotation lever

Rotate at 90°interval
